

Muhammad Talha

Flutter / Mobile Application Developer

☎ (+92) 302-5232179 ✉ talha.cusit.pk@gmail.com [in LinkedIn](#) [GitHub](#) 📍 Peshawar, Pakistan

PROFESSIONAL SUMMARY

Flutter / Mobile Application Developer with 3+ years of experience building cross-platform Android and iOS applications. Strong expertise in Flutter, Firebase, Supabase, REST and GraphQL APIs, scalable mobile architecture, and real-time, offline-first, and role-based access systems. Experienced in Google Maps integration, payment workflows, native SDKs, and AI-powered features using OpenAI and Gemini APIs.

EDUCATION

Master of Science in Computer Science (MScS) *Present*
National University of Computer & Emerging Sciences (FAST-NUCES), Islamabad

Bachelor of Computer Science *2021 – 2025*
City University of Science & IT, Peshawar

EXPERIENCE

Senior Flutter Developer *Sep 2025 – Present*
Infinity Softwares Company, Islamabad

- Build and maintain Flutter apps for Android and iOS using clean, scalable architecture.
- Integrate Firebase, Supabase, REST APIs, native SDKs, and backend services.
- Develop chat, notifications, maps, payments, PDF annotation, offline, and AI features.
- Collaborate with designers, backend engineers, and QA to deliver stable mobile products.

Flutter Developer *Feb 2023 – Sep 2025*
Nextera Software Company, Peshawar

- Delivered cross-platform Flutter applications across food delivery, education, utility, and management domains.
- Integrated Firebase, REST APIs, authentication systems, cloud services, and real-time data features.
- Built payment, notification, location-based, and role-based workflows for production mobile apps.
- Improved app performance, UI consistency, and code maintainability through debugging and refactoring.

SELECTED PROJECTS

Manifesto MD – Clinical Reference & Decision Support App *Nov 2025 – Present*

- Developed a Flutter-based clinical reference app using Firebase Auth, Firestore, Storage, and push notifications.
- Integrated AI-assisted diagnostic summaries and subscription workflows with RevenueCat.
- Managed release workflows through Google Play Console, TestFlight, and App Store deployment:
- [Play Store Link](#)

Chassis Doctor – Motorsport Setup Diagnostics App *Oct 2025 – Present*

- Built a diagnostics app using Supabase, Stripe, and Gemini-powered recommendation features.
- Implemented PDF report generation, structured app workflows, and TestFlight-based testing cycles.

DocuSite – Construction Documentation System *Sep 2025 – Dec 2025*

- Developed a field documentation app with offline-first workflows, push notifications, and cloud sync.
- Integrated native PDFTron SDK in Flutter for PDF annotation, markup, and report-based documentation.

- Supported TestFlight builds for iOS testing and release validation.

Committee App – Monthly Committee Management System

Jun 2024 – Jul 2025

- Developed a role-based committee management app with separate admin and user workflows.
- Integrated Stripe payments, Firebase Cloud Functions, push notifications, and secure backend-driven logic.

Ball-by-Ball Cricket Scoring App

Aug 2024 – Jul 2025

- Built a real-time cricket scoring app using Flutter, Firebase, GetX, and MVC architecture.
- Added live match updates, push notifications, and an AI chatbot for in-app chatbot.

AfghanFlavor – Food Delivery Platform

Mar 2023 – Sep 2024

- Food delivery app using Firebase, MVC, and Google Maps for real-time order tracking and route optimization.
- Built customer/rider flows, live order status, and restaurant-facing features.
- [Google Play Store Link](#)

Durshalta – Multi-Vendor Food & Service Delivery App

Mar 2023 – Sep 2024

- Cross-platform delivery app (iOS & Android) with Firebase, MVC, and Google Maps for live location sharing.
- Implemented dual customer/rider interfaces, real-time order management with push notifications, and delivery verification.
- [App Store Link](#)

Additional projects include Passionport, AMZ Language Learning App, Sesh Builder, Asthma Weather Alert App, Game Grid, USA Soccer League, Fake Finder, Only Noodle, and other social and utility applications.

CORE SKILLS

Languages: Dart, JavaScript, Python, C++, C#

Architecture: Clean Architecture, MVVM, MVC, Feature-First Architecture, Layered Architecture

State Management: Bloc, Riverpod, GetX, Provider

Firebase & Supabase: Firebase Auth, Firestore, Realtime Database, Storage, ML Kit, Cloud Functions, FCM, Firebase Analytics, Supabase Auth, PostgreSQL, Edge Functions, Row-Level Security (RLS)

Backend & APIs: REST APIs, GraphQL APIs, FastAPI, Backend Integration

Features: Google Maps Integration, Native SDK Integration, Stripe & Easypaisa & JazzCash Integration, OpenAI API Integration, Gemini API Integration, Push Notifications, Chat, Payment Integration, PDF Annotation, Offline-First Workflows

Tools: Git, GitHub, GitHub Actions (CI/CD), Codemagic, Bitrise, Fastlane, Postman, Swagger, Android Studio, VS Code

Deployment: Google Play Console, App Store Connect, TestFlight

CERTIFICATIONS & COURSES

Meta Android Developer Professional Certificate (Coursera) *2023*

The Complete Flutter Development Bootcamp with Dart (Udemy) *2023*

Google Flutter Development Certification *2023*

Python for Data Science, AI & Development (Coursera) *2022*

HTML, CSS, and Javascript for Web Developers (Coursera) *2022*
