PROFESSIONAL SUMMARY

Senior Flutter Developer with 3+ years of experience and 18+ cross-platform Android and iOS apps worked on across food delivery, healthcare, fintech, and construction domains, with multiple apps published on the Play Store and App Store. Specialized in scalable mobile architecture (Clean Architecture, Riverpod/Getx), real-time and offline-first systems, and payment integrations (Stripe, RevenueCat, Easypaisa). Proven track record integrating AI features (OpenAI, Gemini), Google Maps, and native SDKs, with end-to-end ownership from architecture to store release.

EXPERIENCE

Senior Flutter Developer

Sep 2025 – Present

Infinity Softwares Company, Islamabad

- Lead development and maintenance of production Flutter apps for Android and iOS using Clean Architecture across multiple client products.
- Architected real-time chat, push notifications, Google Maps, Stripe/RevenueCat payments, PDF annotation (PDFTron), and offline-first sync features.
- Integrated AI-powered features (OpenAI and Gemini APIs) including diagnostic summaries and in-app assistants, reducing manual workflows for end users.
- Own the full release pipeline: CI/CD (GitHub Actions), TestFlight beta cycles, Play Console and App Store Connect submissions.
- Collaborate with designers, backend engineers, and QA in agile sprints, reviewing code and mentoring junior developers.

Flutter Developer

Feb 2023 – Sep 2025

Nexum Technologies, Peshawar

- Delivered 8+ cross-platform Flutter applications across food delivery, education, fintech, and management domains, from requirements to store release.
- Built real-time order tracking with Google Maps and live location sharing for two production food-delivery platforms.
- Implemented secure authentication, role-based access control, Stripe payments, and Firebase Cloud Functions for production apps.

SELECTED PROJECTS

Manifesto MD – Clinical Reference & Decision Support App

Nov 2025 – Present

- Built a Flutter clinical reference app with Firebase Auth, Firestore, Storage, and FCM push notifications; shipped to both stores. ([Play Store](#))
- Integrated AI-assisted diagnostic summaries (Gemini) and subscription monetization with RevenueCat, managing releases via Play Console, TestFlight, and App Store Connect.

Chassis Doctor – Motorsport Setup Diagnostics App

Oct 2025 – Present

- Built a diagnostics app on Supabase (Auth, PostgreSQL, RLS) with Stripe payments and Gemini-powered setup recommendations.
- Implemented PDF report generation and structured TestFlight testing cycles for iterative client feedback.

DocuSite – Construction Field Documentation System

Sep 2025 – Dec 2025

- Developed an offline-first field documentation app with background cloud sync, conflict handling, and push notifications.
- Integrated the native PDFTron SDK in Flutter for on-device PDF annotation, markup, and report generation.

Committee App – Monthly Committee Management System

Jun 2024 – Jul 2025

- Built a role-based financial management app with separate admin/user workflows, Stripe payments, and secure backend logic via Firebase Cloud Functions.

AfghanFlavor & Durshalta – Food & Multi-Vendor Delivery Platforms

Mar 2023 – Sep 2024

- Shipped two production delivery apps (iOS & Android) with dual customer/rider interfaces, real-time order tracking, Google Maps route optimization, live location sharing, and delivery verification.
